

ASSIGNMENT 1 - REFLECTION AND SELF-ASSESSMENT

Name:

Student Number:

Application Name:

SELF-ASSESSMENT

PART A - PROGRAM FUNCTIONALITY (?? / 25)

Working interactive application

Appropriate user input

Meaningful results

Several possible outcomes

Personalised requirement implemented

Comments:

Is there anything about the functionality of your program that you would like the marker to know?

PART B - SELECTION AND DECISION-MAKING (?? / 25)

Correct use of if

Correct use of if-else

Appropriate use of if-elif-else

Compound Boolean expressions

Suitable use of and, or or not

Boundary values handled correctly

Meaningful decision-making

Comments:

Is there anything about your decision-making or selection code that you would like the marker to know?

PART C - FUNCTIONS (?? / 20)

Program appropriately broken into functions

Meaningful function names

Appropriate use of parameters

Appropriate use of return values

Unnecessary repetition avoided

Comments:

Is there anything about your use of functions that you would like the marker to know?

PART D - DATA TYPES AND INPUT (??/ 10)

Suitable variables

Suitable data types

Appropriate use of input()

Appropriate type conversion

Comments:

Is there anything about your use of variables, data types or input that you would like the marker to know?

PART E - CODE QUALITY (??/ 10)

Readable code

Correct and consistent indentation

Meaningful variable and function names

Sensible organisation

Appropriate comments

Comments:

Is there anything about the organisation or readability of your code that you would like the marker to know?

PART F - REFLECTION AND DESIGN DOCUMENTS (??/ 10)

Your design and reflection will be assessed on:

- clarity
- conciseness
- quality of design
- evidence of planning

- thoughtfulness of reflection
- evidence of learning
- identification of challenges
- testing considerations
- appropriate use/declaration of resources and AI
- overall completeness

REFLECTION

1. DEVELOPMENT

Briefly describe how you approached the assignment.

Did your program change from your original design? If so, what did you change and why?

2. CHALLENGES

What was the main difficulty you came across while developing your program?

How did you solve it?

3. TESTING AND BUGS

Describe one problem or bug that you discovered while testing your program and how you fixed it.

Are there any bugs or unfinished parts remaining? If so, briefly describe them.

4. WHAT I LEARNED

What is one thing that you understand better now as a result of completing this assignment?

5. IF I HAD MORE TIME...

What is one thing you would improve, change or add to your program?

RESOURCES AND AI USE

You must list any resources or assistance used while developing your assignment.

This may include:

- module notes or class examples
- websites
- books or videos
- help from another person
- AI tools such as ChatGPT, Copilot or another AI assistant

Resources used:

- 1.
- 2.
- 3.

Did you use an AI tool while working on this assignment?

YES / NO

If YES:

AI tool(s) used:

Briefly explain what you used the AI tool for:

Give one example of something you learned, fixed or changed as a result of using the AI tool:

STUDENT DECLARATION

I confirm that this submission represents my own work and understanding, apart from the resources and assistance identified above.

I understand the code that I have submitted and can explain my design, decision rules, functions and testing.

I understand that I may be asked to attend an interview to discuss my submission and may be asked to explain or make a small change to my program.
